Examination of an exemplar lesson	Video exhibition	Examination of an exemplar lesson

### Workshop Goals

- 1 Introduce three of five "elements" of learning to teachers and how they affect lesson design.
- 2 Provide tools and skills to critically evaluate lessons across these three elements, and how to look for areas to increase impact for learning.
- 3 Use teacher self-selection to organize meaningful time for developing aptitude with deployed apps and services that can help promote deeper learning.
- 4 Develop confidence and inspire teachers to apply technology, when needed, to provide depth in the learning experience.
